### Weddings:

---

I can shoot your special day in a traditional style, contemporary photojournalistic style, or a blend of both. Many couples opt for more casual pictures to remember the reception, but like the staged photos of bride and groom as well as wedding party shots and family pictures. I prefer to meet with you for 1 hour prior to the event to discuss options and map out a strategy with you for the pictures. I don't want to leave out any family members or poses you may have in mind. Once the day is over, only the pictures remain.

I provide a DVD disc of the edited pictures that you can use for re-printing, computer screen savers or electronic picture frames. I also can provide a slideshow of the pictures and day's events with music from your wedding for an additional charge based on length. If so desired, I can post the pictures on the web site for ease of viewing by relatives.

Printing options are varied and plentiful. You can choose to print yourself, or I am available to put together a wedding album on long lasting, high quality paper. I am flexible in this area as I don't want to leave you without options on how to enjoy your photos, but understand budgets for photographs vary.

I use Professional Canon equipment. I shoot with a 40D and keep 2 - 10D cameras as backup. I use Canon professional lenses and flashes. I also have macro capabilities and can get very close shots if desired.

Basic editing and digital enhancements are included at no charge. If you need in-depth work done to a picture, I charge \$25 an hour (average picture might take 5-10 minutes to further enhance)

I reserve the right to use any pictures for my web site unless specifically requested.

Many dates for 2009 are still open and I will book 2010 dates as well.

**Hourly Rate: \$200, Minimum 4 hours**
